THE MAJOR

Degree candidates must declare, and be accepted in, a major field of study prior to enrollment in their last 15 courses. Students may declare or change a Major by completing this form and by obtaining the appropriate Department Chairperson or Program Director's approval. This form must be submitted to the Registrar's Office to complete the process.

ADDITIONAL DEPARTMENT REQUIREMENTS

The Academic Departments below require that additional information be submitted with this Declaration or Change of Major Form before approval will be granted.

BUSINESS:

All students wishing to declare a business major are required to attach a copy of their degree audit to this form.

Students wishing to transfer into Business from any Science or Liberal Arts major must receive the approval of the Business Department Chairperson.

Undeclared Business (UNB) students wishing to declare a specific Business area of concentration (AC, FI, IB, MG or MK) must receive the approval of that specific area's Program Director.

Students wishing to change from one declared Business area of concentration (AC, FI, IB, MG or MK), to another, are not required to receive Departmental approval, but are encouraged to speak with the relevant area Program Director.

ENGLISH - See Department Chair for additional information.

EDUCATION - See Department Chair for additional information.

DOUBLE MAJORS

Students may enroll in two Majors, subject to the approval of the respective Department Chairpersons or Program Directors. This option must be requested by submitting this form along with an approved "Double Major Four-Year Plan" normally prior to enrollment in the student's final 10 courses. In some cases students may need to enroll in more than 40 courses in order to satisfy the requirements of both Majors.

Certain combinations of double majors are not allowed. Please consult with the Department Chair, Program Director or Academic Services when deciding to double major.

Students who satisfactorily complete two Majors will receive one degree from the College, with this exception: If a student satisfactorily completes the requirements for two Majors, whether before or after the student's official graduation, a second degree will be awarded if the second Major's degree (B.A., B.S., or B.S.B.A.) is different from the first Major. The student will be given the option of selecting which degree will be presented at Commencement.

MULTIDISCIPLINARY STUDIES MAJOR

Multidisciplinary Studies is an individually designed major for students who want to accomplish intellectual goals outside a conventional major. Students interested in pursuing a Multidisciplinary Studies Major should contact the Office of Academic Services for guidance.
